DETAILED ACTION

Allowable Subject Matter

Reasons of Allowance:

3. Claims 1-15, 18, 20-24 and 27 (renumbered as 1-22) are allowed.

The following is an examiner's statement of reasons of allowance:

Both the instant invention and the closest prior art Aoyama et al., U.S. Patent 5,048,094, are directed to detecting defect in the electrical circuits by extracting the contour or boundaries of the respective elements of the electrical circuits. The instant invention further recites the limitation "an element matching defect identifier operative to receive said representation of boundaries of elements and a reference representation including reference boundaries for said electrical circuits and to compare boundaries in said representation of boundaries to said reference boundaries to identify element matching defects, said element matching defects including at least one of: elements in said reference representation but missing from said representation of boundaries, excess elements in said representation of boundaries that are missing form said reference representations, and elements in said representation of boundaries defining a different type of element than a corresponding element in said reference representation" in claims 1, 12 and 21,

which is not taught by prior art of record. Therefore claims 1, 12 and 21 are allowed. All other claims depending on claims 1, 12 and 21 are allowable at least by dependency on claims 1, 12 and 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
